REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicant's amendment has overcome the previously applied art of Owen, as Owen does not teach two limitations of the independent claims as amended, the Arithmetic Logic Unit as currently defined, and the ability to read the data and carry information and write both the data and carry information to a register, and instead writes both but reads only the data. The closest remaining prior art found by the examiner is Typaldos et al., which teaches combining data and status information into a single register for a DMA transfer, however, the status bits refer to a data frame, and have no carry flag information, and in addition, there is no evidence in Typaldos that the ALU can read or write this information to the register, nor does a motivation exist in other art to do so, and as such, the claims have been found allowable, as these features have not been found or suggested in any prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert E. Fennema whose telephone number is (571) 272-2748. The examiner can normally be reached on Monday-Friday, 8:45-6:15.
